

ARTISTRY SKILL COMPASSION

By

DR. BENJAMIN SCHLECHTER

SPRING RIDGE PLASTIC SURGERY
WYOMISSING, PENNSYLVANIA

T

reating patients like family is of the utmost importance to Dr. Benjamin Schlechter and he brings this attentive approach to his patients at Spring Ridge Plastic Surgery. "I have made my dream a reality by offering my patients the most cutting-edge technology and surgical techniques and affording them the level of sophisticated care found in nearby metro areas such as Manhattan and Philadelphia's Main Line," says Dr. Schlechter. To remain on the forefront of his field, he has spared no expense in equipping his office with the latest noninvasive and minimally invasive lasers. "I am always open to incorporating new surgical and nonsurgical techniques into my procedures," he adds.

“

I treat every patient as I would expect to be treated.

MEET THE DOCTOR

1.

WHAT DO YOU DO TO PROVIDE THE SAFEST ENVIRONMENT FOR YOUR PATIENTS?

I have been performing cosmetic procedures in an office setting for more than 22 years without incident. When government regulations changed, I built a new state-of-the-art facility, which exceeds Pennsylvania state guidelines. My long-standing relationship with my anesthesiologist has played a big role in safety as well. I have used the same person for 22 years. For increased safety, we do cases under IV sedation, which allows the patient to be asleep yet still breathe on their own without the need for a ventilator. Neither my anesthesia personnel nor I take any chances

2.

WHAT ARE YOU BEST KNOWN FOR?

Breast procedures have always been what I was best known for, however over the past five years I've been doing far more facial procedures and earning a great reputation for facelifts, necklifts, laser resurfacing and eyelid surgery

3.

CELEB PHOTOS MY PATIENTS MOST OFTEN BRING IN

Katy Perry and Angelina Jolie

4.

WHAT SETS MY PRACTICE APART

In conjunction with the ZO® Skin Health protocol preparation, we offer a controlled depth TCA peel immediately followed by a SmartSkin® CO₂ laser resurfacing treatment that dramatically revitalizes the complexion and erases years of aging

5.

WHAT TREND DO YOU THINK PEOPLE STILL DON'T GET?

The idea of minimally invasive surgery. Patients don't understand it is still surgery and will require some recovery. They also expect that minimally invasive should be less expensive, which is not often the case. The technology that yields the best results, such as a laser necklift, utilizes cutting-edge devices

Reshape and Refine

This 37-year-old patient was unhappy with the prominent hump on her nasal bridge and underwent a rhinoplasty to refine the angle and shape of her nose.

PHOTOGRAPH BY: THE BMP FILM CO.

THE PROCEDURES I PERFORM MOST OFTEN

Breast augmentations or facelifts, both of which are rewarding because of the immediate result

MY DREAM INNOVATIONS

Cosmetically, a longer-lasting neuromodulator. Medically, I'd find a way to eradicate breast cancer
